

TOLEDO IS SITTING ON A GOLD MINE

Opal Covey
Toledo's next Mayor
A Miracle Worker

You're probably wondering what this Gold mine is and why are we so broke sitting on a Gold mine? I just gave you the answer, Toledo is sitting on the Gold Mine instead of refining it to make it profitable and turn it into cash.

Our Gold Mine includes our beautiful Hotels, one of the best Zoos in the world, one of the most outstanding Art Museums in the World, A spectacular Sports Arena and outstanding Fifth Third Field, Restaurants galor with about every Country represented in their menues, the fabulous Farmer's Market and Erie St. Market, parking Garages, our beautiful Boating and entertainment Maumee River, Our recently installed Veterans Glass City Skyway beautiful Bridge, plenty of shopping Malls and Grocery Stores , a science blessing Cosi, and much more, but there's a piece of the Gold mine missing that keeps the Gold Mine from being refined to produce money, much needed money to pay for our proper police protection, sufficient pools for the summer, good upkeep of our Parks and streets, sufficient city employees, and all our needs of the city so there will never be a deficiency of money again!

Well now, you are now probably saying what is this missing piece of our Gold Mine that keeps us broke and in the red and having to do without our desperate needs such as our Policemen. Raising taxes is never the total answer, but the answer is to make more revenue. How do we make more money? We have to create jobs, new businesses and new faces. So now let's call this missing piece of our Gold Mine "creation". It's like the match that burnt the forrest up. This match will make everything I mentioned above wake up from its sleep and start to work for you producing the jobs, businesses and revenue we need.

Even though this missing piece of our Gold Mine is called creation, it has a real name and function. Ready for this? Look up to the top of this page on the left you will see a roller coaster. This is the missing piece that will cause our financial explosion. I will create "Paradise Amusement Park" where Promenade Park is by the river. Now your Gold Mine is complete. It is the key for Tourist trade. Without this Amusement Park, the Gold mine cannot function. When the Paradise Amusement Park is installed, we will begin refining our Gold Mine. The Hotels, Restaurants and everything I mentioned will wake up from their sleep and be refined by the millicns of Tourists who they will serve. I say " look out revenue here it comes". We now are no longer sitting on our Gold Mine that's been sitting for a very long time. Remember, I told all of you about this in the 2001 Mayoral race and also in 2005. I am very happy to do this for you. Giving up my life to do this for you is nothing compared to the joy I will get when I see millions coming to this city and spending millions, new businesses, new residents, new jobs and seeing young people enjoying the Amusement Park instead of the Streets. And oh yes; I haven't forgot the Erie St. Market, the Marina District, and other things that need to be rejuvenated, but; I must start with the Amusement Park to jump start the economy and get needed services back again. It is my hope to get the park up and running the first summer I'm in office so jobs and revenue will start to grow. I'm hoping to reduce taxes soon as possible. I know we'll be in competition with Cedar Point, but don't that make you feel good!
